

Prince Faisal Villa

Riyadh-KSA
Residential

Year: 2015

Value: USD 10,000,000

Project Highlights

This villa was an extreme renovation for a 20 years old building, that has a memorial value to owner to keep and refurbish.

Our scope was to deliver a complete design vision and perspective to what it should look like taking into consideration client's preferable modern approach.

The process of design started from finishing materials selection as a first step. As a second step was to utilize these modern unique materials to fit design ideas through sketches ending up with 3ds.

Materials used:

Materials have been selected from abroad, China and Italy, where there were huge varieties of selections and colors of multi decorative and finishing materials, such as; Lime stone cladding, engrave marble cladding, acid wash engraved marble panels, onyx, marquetry mother of pearl panels, beads wallpaper, snake leather and fabric wallpaper. We based our designs on these selection, and referred back to client's preferable color schemes, the end results were a final 3ds that represents exactly what we had in mind that met client's visions.
