Year: 2015
Value: USD 80,000

Project Highlights

This is a small fast track project, refurbishment and decoration was the main scope of work that had to be finalized in 20 days.

It consists of open reception area, dining area and two master bedrooms, floor to ceiling panoramic view on Sultan Ahmed's famous mosque in the central heart of this metropolitan city.

Design focused on enriching modern treatments in decoration, maintaining comfortable and elegant furniture. Automated curtain is controlled remotely in three layers of sheer, top curtain and side dress, giving the user to choose the sun light shade needed.

Accessories were main items that were selected to meet client's taste, especially the authentic pieces with Arabic calligraphy that represent the cultural influence around in a modern technique.

Bathrooms were small, yet we tried to create some trick to enlarge their spaces, such as using a clear glass separation between the shower and bedroom.
